Purpose

It is our belief that business must play an important role in driving and enabling sustainability and help solve the world's major problems. That's why we're determined to actively contribute to the transition to a low-carbon economy as well as assuming our responsibility when it comes to supporting wider society, including social and micro-enterprises. We make every effort to continuously develop our business model, processes and habits to enhance sustainability. To ensure our employees can bring about positive change with us, we invest in their upskilling and awareness and provide them with opportunities to support communities and charitable organisations.

Commitment to the environment

GHG (greenhouse gas) emissions in tCO₂e*

	FY19 (baseline)	FY20	FY21	FY22	FY23	FY24
Direct emissions**	358	316	238	233	261	251
Indirect emissions (market based)***	1,312	322	293	290	285	259
Other indirect emissions****	12,336	8,449	957	3,305	4,587	4,927
Total (market based)	14,006	9,087	1,488	3,828	5,133	5,437
Indirect emissions (location based)***	496	434	520	510	386	362

* Emissions figures for FY19-FY23 may vary from previous external reporting owing to data revision and data improvements.

** Direct GHG emissions according to GHG protocol Scope 1: owned or controlled by the firm, for example emissions from combustion in owned or controlled boilers, furnaces, vehicles, etc.

*** GHG emissions according to GHG protocol Scope 2: purchased heat and electricity.

**** GHG emissions according to GHG protocol Scope 3: air travel, commuting, overnight stays, road, train and taxi. We are currently exploring further relevant Scope 3 emissions categories.

Commitment to society

614 (-25%) beneficiaries reached

780 (+21%) participants
in community activities
