

RISE with SAP, Transcend with PwC

**Unlocking business value with
easier cloud transformation**

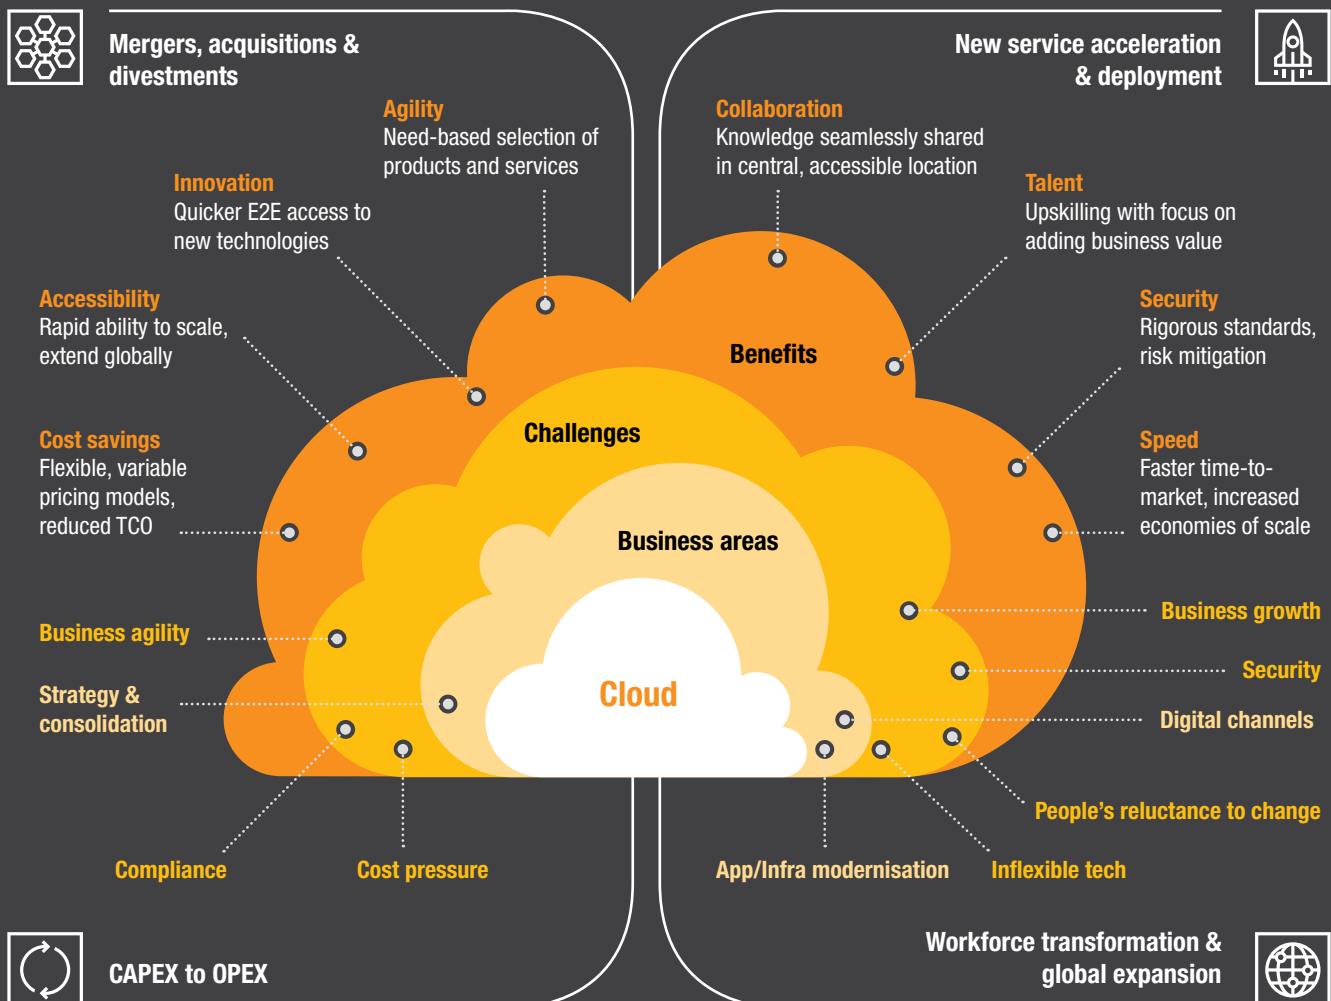

Why organisations are moving to the cloud

Cloud is shifting the way enterprises look at how IT systems can enable business transformation

Cloud is the driving force powering digital transformation today allowing disruptive innovation that democratises IT and increases business agility. Cloud transformations whose infrastructure is enabled by cloud hyperscalers like AWS, MS Azure, GCP and Alibaba, lower technical and operational complexity making organisations less dependent on legacy IT, and boosting business-led innovation.

The cloud is also a key driver for the realisation of new business models in the digital environment. In this respect, the cloud is more than a guarantee for future-safe infrastructure and applications. It fundamentally simplifies the manner and methods in which we design and use digital solutions.

In this context, RISE with SAP is a comprehensive offering that facilitates holistic transformation and smooth migration to S4/HANA Cloud. With RISE, organisations seeking to transform to intelligent enterprises are not limited by their current ERP implementation or by the complexity of their business IT landscape. Rather, the starting point is completely open. This means you could currently be using a legacy ERP, implementing the on premise edition of SAP S/4HANA, or just starting your ERP journey.

Cloud is the driving force powering digital transformation today allowing disruptive innovation and increasing business agility.

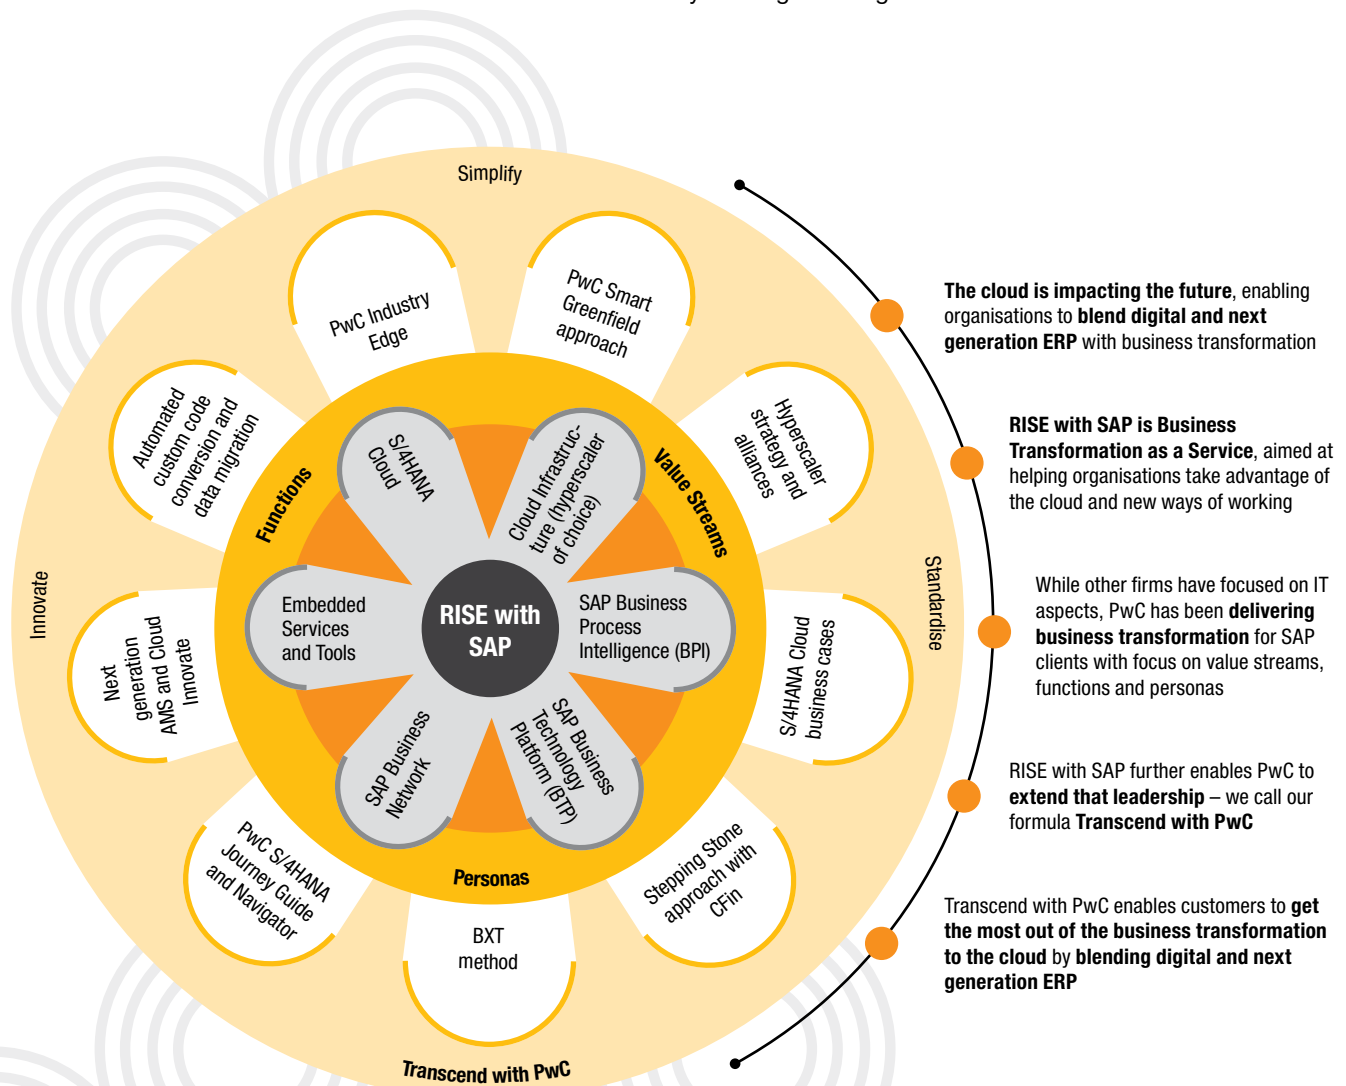

Cloud transformation with Transcend with PwC

Transcend with PwC enables organisations to get the most out of the business transformation to the cloud.

Only cloud transformation has what it takes to support business transformations in a sustainable and resilient way. RISE with SAP is helping clients migrate their business to the cloud. Developed with this goal in mind, RISE with SAP is a subscription-based offering, designed to help organisations boost agility, strengthen resilience and enable innovation using the latest cloud technologies and SAP features.

PwC's goal is to help companies maximise the value of their SAP S/4HANA Cloud business transformation and set a direction for long-term digital success.

Our approach to this is called Transcend with PwC and it is built on a clear vision that will help you go beyond transformation; We combine business transformation and S/4HANA assets with industry and business function value frameworks to supplement RISE with SAP and help our clients maximising the business value of the S/4 HANA Cloud business transformation – laying the foundation for your long-term digital success.

Phases of Transcend

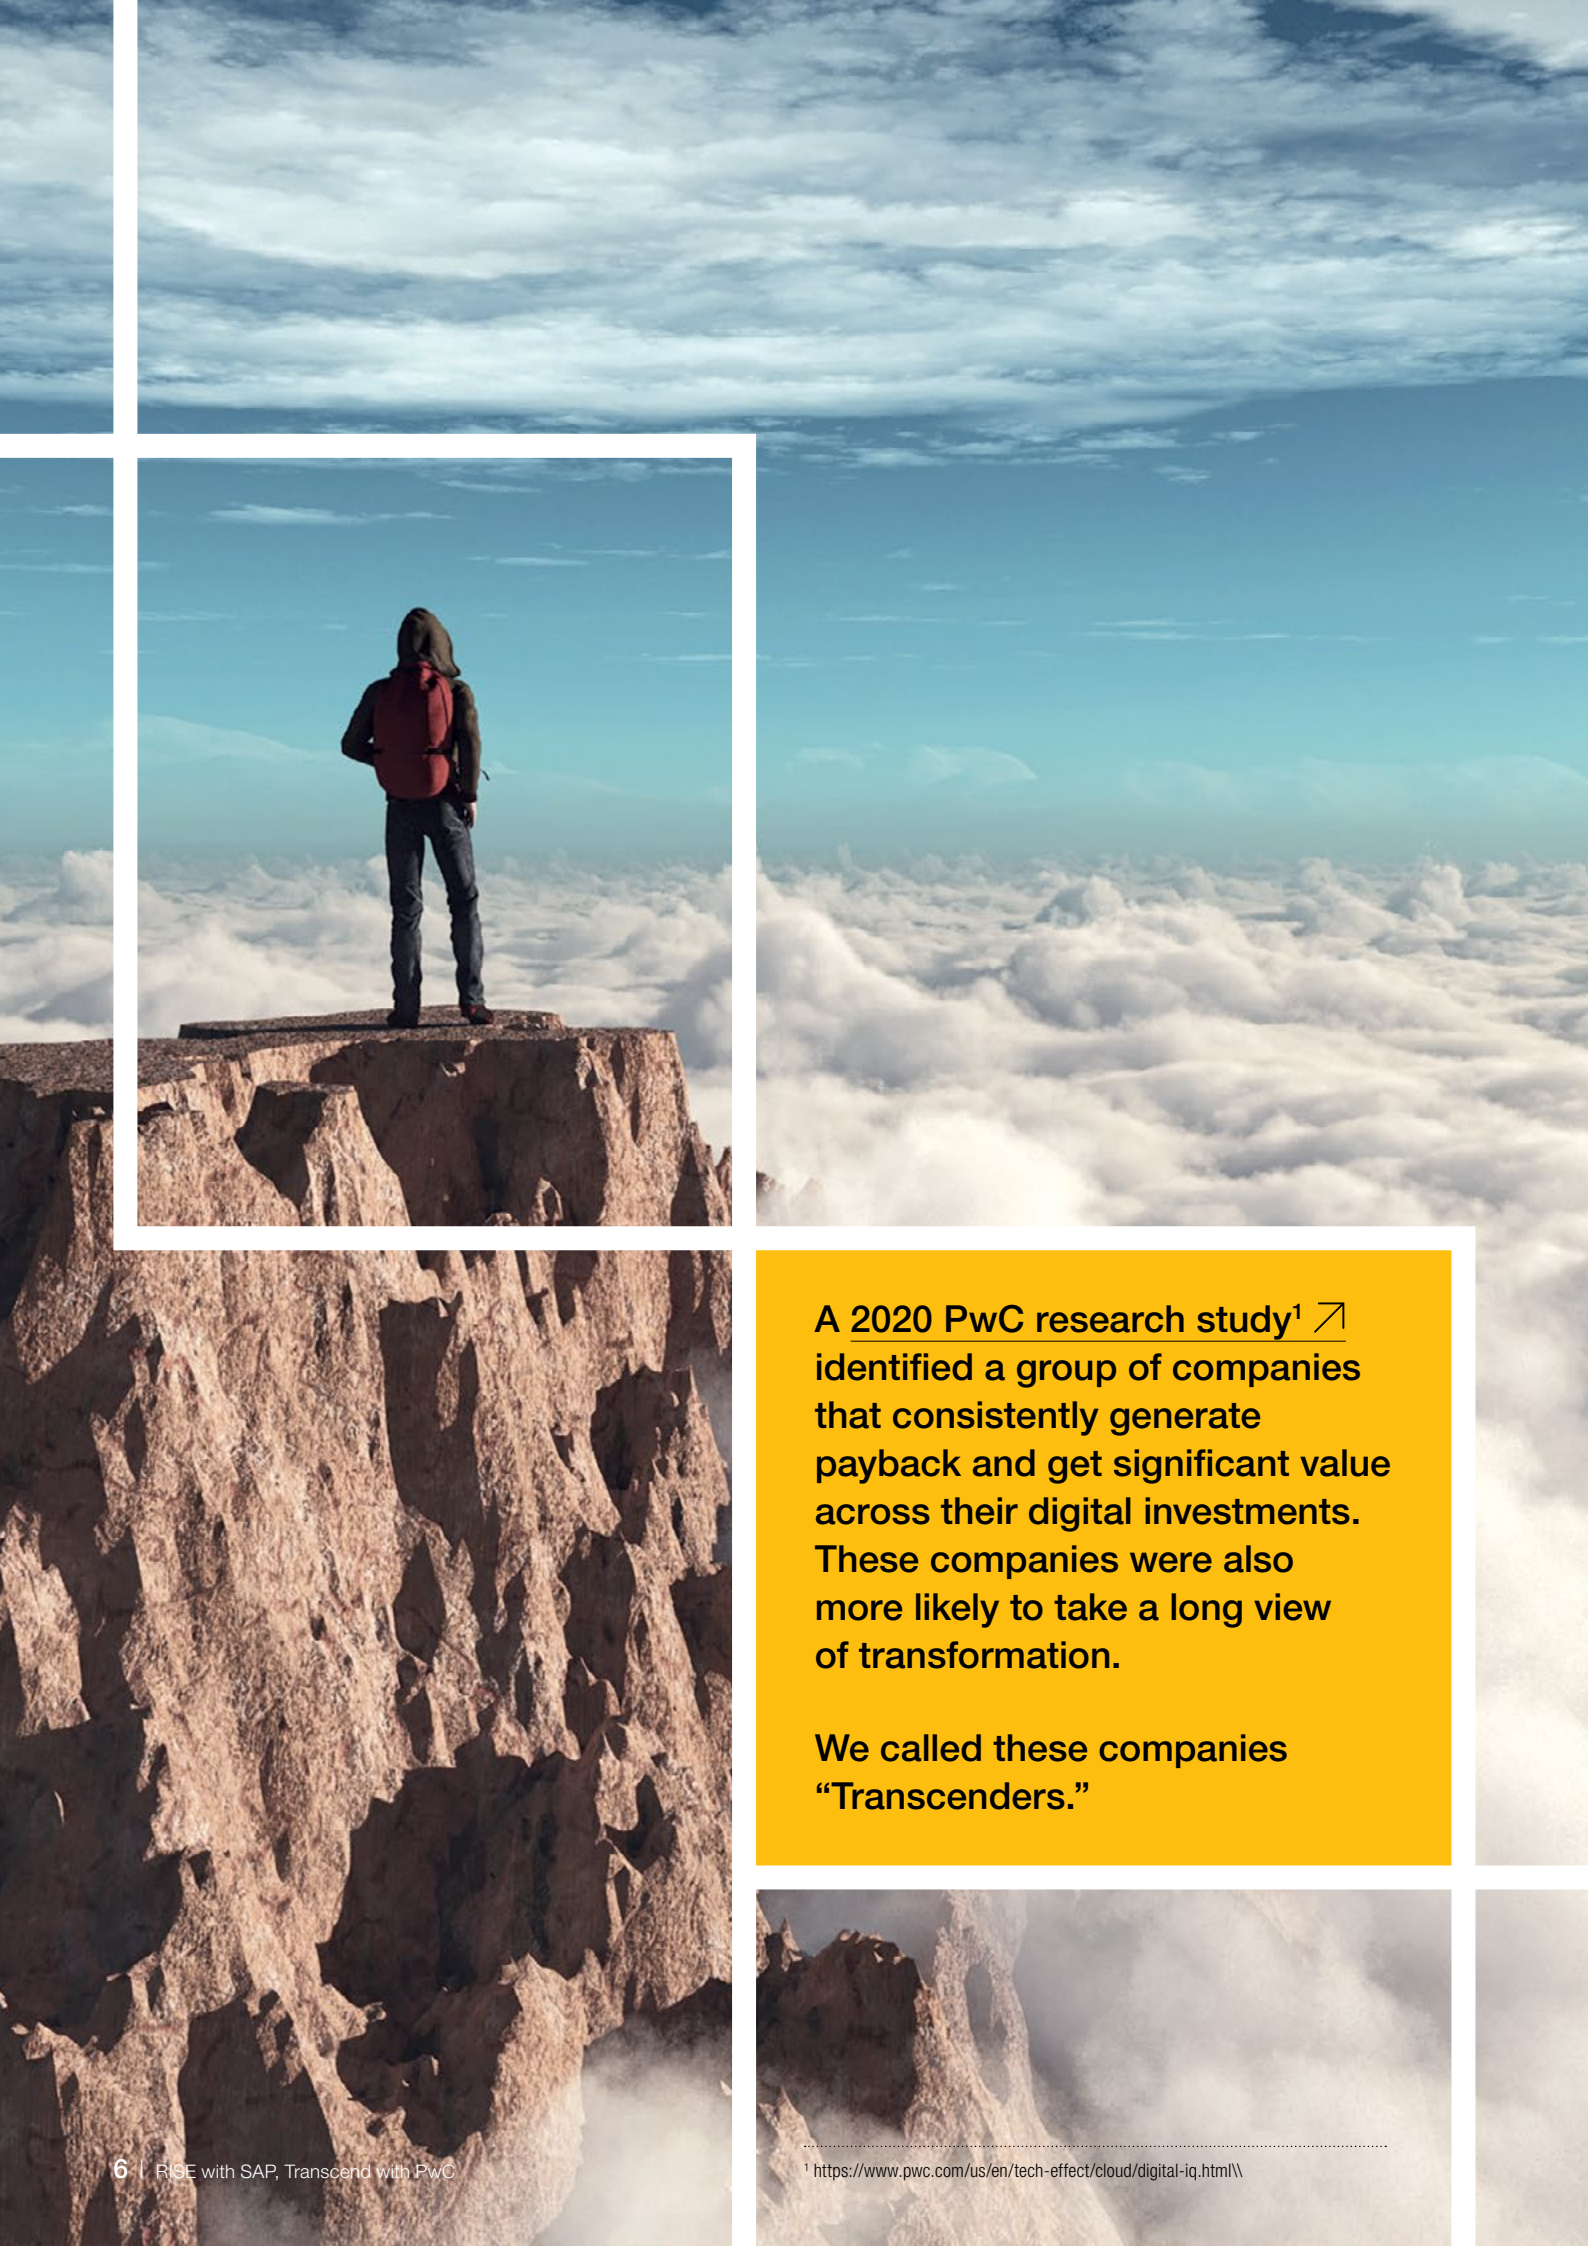

with PwC

To help companies maximise the business value of their S/4HANA Cloud business transformation and set a direction for long term digital success, we bring business transformation and S/4HANA assets, industry and business function value frameworks, and a clear vision to supplement RISE with SAP and enable organisations to go beyond transformation and become Transcenders.

We call our approach Transcend with PwC and have structured it in four phases.

	Key outcomes	PwC tool & methods
<p>Business cloud strategy Align on business and IT strategy as foundation for cloud transformation</p>	<ul style="list-style-type: none"> • Cloud adoption assessment • Target cloud architecture • Cloud governance model 	<ul style="list-style-type: none"> • 360° cloud adoption assessment • Hyperscaler strategy • Cloud migration factory • Audit for cloud infrastructure
<p>SAP S/4HANA cloud planning Build the case for change and plan the path forward</p>	<ul style="list-style-type: none"> • Target S/4HANA Cloud Architecture • S/4HANA Cloud Roadmap • S/4HANA Cloud business case 	<ul style="list-style-type: none"> • BXT methodology • BPI / process mining accelerators • S/4HANA Journey Navigator App • S/4HANA Cloud Business Cases • Cyber Security Framework
<p>SAP S/4HANA cloud transformation Deliver business value with quick adoption and time to value</p>	<ul style="list-style-type: none"> • S/4HANA Cloud innovation • PwC technology & business innovation • Industry Cloud solution on BTP 	<ul style="list-style-type: none"> • Smart Greenfield approach • Industry Edge • CFIN Stepping Stone approach • BPR for Brownfield/Bluefield* • Custom code conversion* • Xtract and Workbench for post migration data validation/audit • Cloud change management
<p>SAP S/4HANA Cloud Innovation Drive continuous innovation and optimisation</p>	<ul style="list-style-type: none"> • Target S/4HANA Cloud Architecture • S/4HANA Cloud Roadmap • S/4HANA Cloud business case 	<ul style="list-style-type: none"> • BXT combining business, human experience and technology • Next Generation AMS • Cloud Innovate

A 2020 PwC research study¹ [↗](#) identified a group of companies that consistently generate payback and get significant value across their digital investments. These companies were also more likely to take a long view of transformation.

We called these companies “Transcenders.”
